PROFESSIONAL IN SHIP REPAIR FOR OVER 35 YEARS!

Leendert Muller

In the year 1985 Wim Muller started Terneuzen Port Service, with main activities machine repairs and general ship repairs.

10 years later, I have continued and slowly changed the business into a specialized ship repair company with all necessary services...24/7!

Nowadays we not only work for shipping, we also count contractors and suppliers of shipping among our customers. Over the years we have expanded our services to engine room preservations (worldwide), perform pressure tests, take care of Warehousing & Forwarding and we are a distributor of the great product Ivegor Multi Putty (TMS)

Terneuzen Port Service only employs professionals with all the necessary knowledge and a wealth of experience. With this we can solve every challenge and keep our service high and quality at its best.

By being flexible and thinking in solutions we make the difference in many ports.

Trouble shooting in shipping!

Terneuzen Port Service is an internationally operating ship repair company. We carry out the majority of our (repair) work on board seagoing ships. Our clientele includes shipping, contractors and various ship suppliers.

- * General ship repairs
- * Pressure testing of fuel tanks
- * Engine room preservation (salvage)
- * Supply of technical spares
- * SS / Aluminium / Cunifer production
- * Warehouse activities

Rental

If you need equipment for a short period of time to carry out maintenance, rent is an excellent solution. The materials that we rent out meet all legal (safety) regulations. The materials we rent are:

- * Scaffolding * Cherry pickers * Generators * Cranes *
- * Welding machines * Heaters *

Strong in ship repairs

International shipping places high demands on materials, people and resources.

We at Terneuzen Port Service know that better than anyone. We are available 7 days a week, 24 hours a day, anywhere in the world.

We are fully prepared for this with the necessary instruments, machines and of course specialized manpower.

And with the right tools in our workshop, we can process almost any type of material.

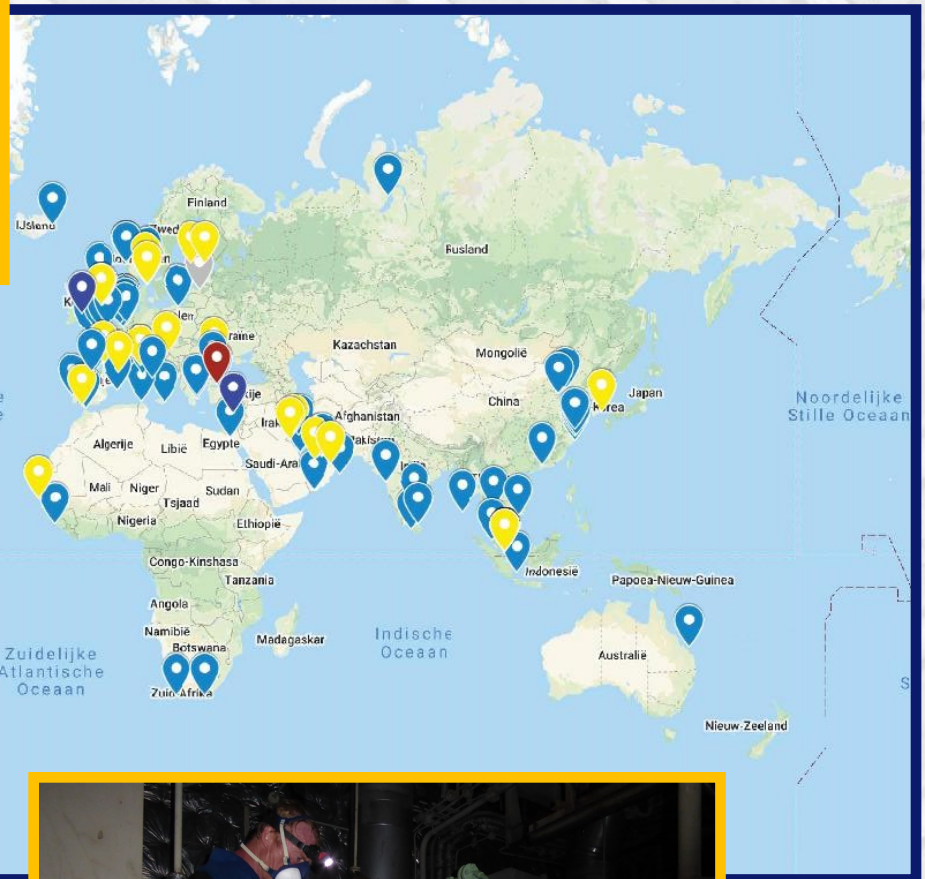

PRESERVATION ENGINE ROOMS WORLDWIDE!

If a machine room has been flooded or if there has been a fire, it is important to treat the tools against corrosion as soon as possible. This treatment preserves the value and condition of the machines as well as possible.

The activities start with a thorough inspection of the machines. Then the machines are cleaned and treated, in the right place and with the right products. In almost all cases, we perform these preservation activities at the scene of the calamity.

Terneuzen Port Service is a specialist in this field and works for all major (inter) national recovery companies.
